Summary

Highly motivated software engineer with expertise in full-stack development using Python, JavaScript, React, Node.js, and Flask. Skilled in building scalable, secure, and AI-driven applications with a strong focus on backend systems, problem-solving, and collaborative development.

Education

Vikas Vidyalaya, Tiruppur	2024 – 2025
HSC - Computer Science	Percentage: 92.16
Sri Eshwar College of Engineering, Coimbatore	2025 – 2029
B.Tech in AI & Data Science	CGPA: 8.19

Projects

CVortex	2026
<i>Flask, FastAPI, NLP Libraries</i> — Live	
- Built an AI-powered resume analysis platform using machine learning and NLP. - Delivered personalized feedback to improve resumes for 10,000+ users. - Increased user success rate by 40%.	
Digital Death Locker	2026
<i>MongoDB, React.js, Node.js, Express.js</i>	
- Developed a secure system for storing and transferring sensitive digital assets. - Ensured high data privacy and controlled access mechanisms. - Achieved 95% user satisfaction with reliable and scalable architecture.	

Work Experience

MK Code Club, Tiruppur	2026
Frontend Developer	
- Led frontend development for web applications, contributing to 25% business growth. - Improved UI/UX, increasing customer satisfaction by 30%. - Maintained 99.9% uptime with scalable and efficient solutions.	

Technical Skills

Languages: Python, Java, C, C++, JavaScript
Frameworks: React, Next.js, Node.js, Flask, FastAPI, Scikit-learn
Tools: Git, GitHub, VS Code, npm
Databases: MySQL, PostgreSQL, MongoDB, SQLite
Core CS: Data Structures
Languages Spoken: English, Tamil

Achievements & Certifications

- Certified in Python by Scrimba (2025)

Coding Profiles

Active on coding platforms with consistent problem-solving practice: LeetCode (221 problems solved), Geeks-forGeeks (92 problems solved), and Skillrack (1079 problems solved), demonstrating strong analytical thinking and proficiency in data structures and algorithms.
